

# AIRplus® ESD Film

AIRplus® ESD Void Film for cushioning, void-fill and block & brace

AIRplus® ESD CushionFilm for cushioning and wrapping

AIRplus® Void Film and Cushion Film from Storopack are now available in an ESD film version for the protective packaging of electronic components. The film complies with the requirements for electrostatic dissipating materials. It has been developed by Storopack and is now shipping from several of Storopack's production sites.

- Electrostatic dissipating film
- Developed and produced in own locations
- Complies with the requirements for electrostatic dissipating materials
- “On-demand” packaging material
- Availability in a variety of air cushion styles from Storopack

The more complex and more miniaturized active electronic components become, the more sensitive they are to electrostatic discharge (ESD). High potential differences arise when two surfaces rub together. This can occur simply by walking over a carpet or when handling packaging.
