

## AIRplus® Bag Separator and AIRplus® IDS System

- Maximize production space with smaller footprint
- Reduce handling/touches
- Lower operational cost
- Improve working comfort with better ergonomics
- Increase throughput

AIRplus® by STOROPack

### Expand your choices with Storopack's Single Source Triple Advantage!

Storopack's Triple Advantage offers from one source:

- product choices
- availability
- reliable technology

- 1 Product:** A full range of in-the-box packing materials and equipment for solutions that satisfy every need.
- 2 Geography:** More than 20 manufacturing facilities in North America and more than 50 combined locations worldwide for fast, attentive service and delivery.
- 3 Technology:** Cost-effective, efficient and environmentally friendly product technology. The newest technology for reliability, speed and ergonomics.

# AIRplus® Separator & IDS

NEW FROM  
STOROPACK!

STOROPack

# Increase throughput and lower operational costs

The AIRplus® Bag

Separator and

the AIRplus® IDS

(Intelligent Delivery

System) reduce

handling — providing

ergonomic benefits that

help increase throughput

and lower operational costs. Air

bags are automatically separated and

fed into overhead hoppers to be dispensed at single or multiple work stations.

## AIRplus® Bag Separator

The AIRplus® Bag Separator conveniently separates air bags into single bags or in strips of pre-determined lengths for optimal application. In addition, providing packers pre-separated air bags means fewer touches of bags during packing resulting in less worker fatigue and faster production.

### Specifications

Size: 32" H x 20" W x 15" D

Weight: 74 lbs

Power: 120 v

Speed: 18 fpm

## AIRplus® IDS

As bags are separated they're fed into overhead hoppers then dispensed at the work station for fast and easy application by the packer. With the IDS, one AIRplus® machine with a Bag Separator can deliver bags to a single work station or help you maximize your packing capability by delivering bags to multiple work stations.
