

Expand your choices with Storopack's Single Source Triple Advantage!

At Storopack you'll find the product choices, availability, and reliable technology you need from one source. The power of Storopack's Triple Advantage makes it possible to create and coordinate workable solutions for positive outcomes with increased throughput, lower material cost and reduced damage.

- 1 Product:** Our broad range of packing materials and equipment give you access to solutions that satisfy every need from void-fill to protective cushioning for everything from fragile items to heavy industrial products.
- 2 Geography:** Storopack has more than 20 manufacturing facilities in North America and more than 70 combined locations worldwide for fast attentive service and efficient delivery of our products.
- 3 Technology:** Storopack is technology driven to develop cost-effective, efficient, and environmentally friendly products. Our equipment includes the newest technology for reliability, speed and ergonomics, and we provide the latest software and system upgrades.

More solutions from one source.

5 Keys to a Successful Packing Station

STOROpack

RL-US-0510

STOROpack

Storopack helps you achieve your ideal packaging process

An article published in the March, 2010 issue of DC Velocity magazine reviewed five common pitfalls to avoid when setting up a packing station. In this brochure Storopack offers additional advice and suggestions as they relate specifically to your “in-the-box” packaging materials.

1: Take control over the use of your “in-the-box” packaging materials

Using too much, too little, or the wrong packaging materials can lead to waste and product damage. Storopack helps solve these issues with “fit for purpose” solutions that give you better control over your packing process, and put the right “in-the-box” materials in the hands of the packer.

- Multiple packaging materials conveniently integrated at individual work stations
- Programmable controls that dispense the right amount of paper or foam, and manage air fill
- Wide selection of air pillow and air cushion sizes
- Multiple paper product choices to fit all cushioning and void-fill applications
- On-demand foam including our Universal Foam product that fits most packing applications
- Standard and Biodegradable Loose-Fill
- Convenient cushioning pads that replace custom packaging materials

2: Consider the carton

When it comes to the carton there are two considerations relating to your in-the-box packaging material costs. First, training workers to use the right size carton can reduce your “in-the-box” material usage resulting in annual savings of thousands to hundreds of thousands of dollars depending on your volume. Second, Storopack packaging materials are designed to provide greater protection and more reliable support “in-the-box” so you can confidently use thinner, less expensive boxes with less concern for carton collapse.

3: Plan for sufficient work space

Using work space efficiently is key. Crowding the packing area can interfere with work flow and slow down production. Again Storopack provides multiple options to utilize space as efficiently as possible and keep production moving.

- On-demand systems for air, foam and paper products
- Small footprint machines
- Integrated Delivery Systems providing materials to multiple work stations from a single source
- Overhead delivery and other space-saving storage
- Custom modification of machines to integrate directly into a work table or speed line
- Air bag systems with automatic supply checks
- Automatic cushion film coiler

4: Automate in-the-box packaging for the best value

While there is automated equipment offered for many packing tasks, you’ll find that incorporating Storopack machines for your in-the-box packaging materials provides true value through multiple advantages and real-life production considerations. In addition, Storopack equipment is of the highest quality, engineered to meet the needs of today’s packaging challenges, and supported by thorough training and prompt, professional service.

- Fit-for-purpose design flexibility
- Speed and efficiency
- Easy and reliable operation
- Ease of integration
- The latest technology and capabilities

5: Design packaging stations with the worker in mind

Providing workers with proper ergonomics helps to prevent on-the-job injuries and increase throughput. Storopack machines and products provide the latest technology and worker focused features. Plus, our expert integration engineers plan for optimal placement to ensure working comfort that enhances productivity.

- Stands that swivel and adjust to operator height
- Material loading accessibility and weight considerations
- Automated separation and cutting of materials to minimize handling
- Careful planning and placement to optimize productivity
