AIRplus® 100% RECYCLED

RESOURCE-SAVING AND SECURE

AIRplus® 100% RECYCLED IS LIGHTWEIGHT PROTECTIVE PACKAGING.

Storopack AIRplus® 100% Recycled film consists of 100 percent recycled material and is ideal for companies looking to reduce their use of virgin plastic. The film is made of 85% post-consumer and 15% post-industrial recycled material and delivers the outstanding properties associated with conventional AIRplus® cushioning. AIRplus® 100% Recycled films are lightweight and space-saving thus minimizing operational costs while also helping reduce greenhouse gas emissions and water consumption*.

AIRplus® 100% Recycled meets all requirements of the ClimatePartner certification

We work intensively to reduce the emissions of our products. However, it is not possible to avoid all emissions during production and shipment.

Therefore, we work with ClimatePartner to measure and reduce the carbon footprint. The “ClimatePartner certified” label confirms our work on good and impact-aware product design and conscious decision-making. For all residual CO₂ emissions, Storopack supports climate projects.
