

PAPERwrap

VERSATILE AND
USER-FRIENDLY

PAPERwrap REPRESENTS RECYCLABLE PACKAGING FOR VERSATILE PROTECTION.

Storopack's PAPERwrap is the smart alternative to traditional air bubble film or rolled foam made from polyethylene.

The protective packaging is made exclusively from the renewable raw material paper and can therefore be 100% recycled. Depending on the application, Storopack customers can choose from single and two-ply paper for perfect product protection and optimized use of resources.

The 3D honeycomb structure of the die-cut kraft paper ensures optimal cushioning, while the optional inner layer of tissue paper is used for particularly delicate surfaces. Items are thus reliably protected from shocks, scratches, and damage during transport.

Simple and efficient:

The compact machine is ready at the press of a button and can be set up for simple integration directly at the packing station or mounted on the wall. It can dispense both papers at the same time if necessary and provides fast access.

PAPERwrap AT A GLANCE

Suitable shipping goods	▶ SMALL AND FRAGILE PRODUCTS
Applications	▶ WRAPPING, CUSHIONING, FILLING VOID, AND SURFACE PROTECTION
Flexible	▶ DEPENDING ON THE APPLICATION, THE PACKER CAN SIMPLY WRAP THE GOODS WITH THE HONEYCOMB PAPER OR USE AN ADDITIONAL TISSUE PAPER ▶ HONEYCOMB PAPER AVAILABLE IN BROWN AND WHITE AND IN VARIOUS WIDTHS

Effective	▶ GUARANTEES A POSITIVE UNBOXING EXPERIENCE FOR THE END CUSTOMER

STOROPACK - PERFECT PROTECTIVE PACKAGING

Wherever in the world you send your products, we want them to be well protected while in transit.

PAPERwrap IS THE SMART AND EASY WAY TO PACK.

PAPERwrap is another alternative to traditional air bubble film or rolled foam made from polyethylene. It is made exclusively from the renewable raw material paper and can therefore be fully recycled. The 3D honeycomb structure provides optimal cushioning, while the tissue paper protects sensitive surfaces such as stainless steel or glass.
